

Project Summary

Client Name:
Companion Linc

Date Completed:
January 2007

Location:
Lincoln, Nebraska

General Contractor:
Manzitto Construction

Size:
9,600 SF

Project Scope:

Companion Linc

Ironhide Construction supplied and erected a Chief pre-engineered metal building for the Companion Linc project in Lincoln, Nebraska.

Ironhide installed insulated metal panels on the front side of the building, while the sides and back were paneled with a traditional metal panel. The building features two different insulated metal panels run both horizontally and vertically.

Ironhide Construction is a leading Midwest general contractor and structural restoration company. From design to project management to construction, Ironhide transforms metal into modern, custom buildings that are functional and stylish. Ironhide Construction is also one of only a few companies in the region that specializes in the challenges of structural restoration, as well as develops phased maintenance plans for buildings, parking garages, and other structures. Ironhide approaches every project with transparency, accountability, and quality results from proposal to completion.
